

Gearlinx Company Description

Approved 50- and 100-word versions for reseller websites, vendor listings, event materials, and customer introductions.

HOW TO USE

Choose the version that best fits the available space. Both are approved for partner and reseller use.

50-WORD VERSION Short listings + quick introductions

Gearlinx® delivers cloud-managed out-of-band management built for modern network resilience. Our Total OOB™ platform combines secure remote access, cellular connectivity, edge compute, automation, and centralized cloud visibility through ZERO. Gearlinx helps organizations keep critical infrastructure reachable, recover faster from network disruptions, reduce truck rolls, and simplify operations across distributed environments.

100-WORD VERSION Web pages + event profiles

Gearlinx® delivers cloud-managed out-of-band management built for modern network resilience. Our Total OOB™ platform combines secure remote access, cellular connectivity, high-density console management, edge compute, automation, and centralized cloud control through ZERO. Together, the NR4400 Network Resilience Platform, Duckfone® cellular gateway, and ZERO help IT and network teams keep critical infrastructure reachable when the primary network fails. Gearlinx gives organizations the visibility and control to recover faster, reduce truck rolls, automate routine tasks, manage distributed sites, and improve operational resilience. From data centers and colocation facilities to branch, edge, and remote environments, Gearlinx keeps teams connected and infrastructure manageable anywhere.
