

CLOUD-BASED CENTRALIZED MANAGEMENT

ZERO

One portal. Complete control.

ZERO gives network and infrastructure teams a centralized cloud management layer for Gearlinx fleets and third-party devices - combining visibility, control, alerts, reporting, lifecycle data and subscription management in one intuitive portal.

ZERO Manages Your Total OOB® Network

ZERO brings together the operational and lifecycle information teams need to manage distributed infrastructure without relying on spreadsheets or disconnected tools.

01

See the fleet

View status, location, serial numbers, warranty, subscription and support data in one portal.

02

Act from anywhere

Configure, monitor and troubleshoot connected infrastructure from the cloud.

03

Operate at scale

Manage organizations, device groups, alerts, reports, subscriptions and edge deployments.

FROM DEPLOYMENT THROUGH LIFECYCLE MANAGEMENT

BUILT FOR

Data Centers • Colocation • Enterprise Edge • Branch & Retail • Remote Sites

BUILT FOR CENTRALIZED CONTROL.

VIS

Fleet visibility

See Gearlinx and third-party devices in one view, including organization, sub-organization, location, device type and status.

OPS

Remote operations

Centralize configuration, monitoring and troubleshooting workflows for infrastructure attached to Gearlinx platforms.

EDGE

Edge deployment + scale

Simplify distributed edge deployments by scaling feature containers and applications to remote sites from ZERO.

ZERO CAPABILITIES

One cloud. Practical operational control.

- Fleet + group management
- Locations + asset data
- Warranty + subscriptions
- Alerts + reporting

ZERO + ORAAS

Operational resilience beyond remote access.

ZERO is the cloud portal for NR4400 and Duckfone ORAAS subscriptions. Centralize access, control, lifecycle information and fleet context across Gearlinx and third-party infrastructure.

ACCESS — VISIBILITY — LIFECYCLE — CONTINUITY

TECHNICAL HIGHLIGHTS

- **OpenID SSO**

Use Microsoft 365 or Google credentials to sign in.

- **Lifecycle visibility**

View subscription status, serial numbers, warranty information, location, device type and status.

- **Subscription control**

Co-term subscriptions and pool remaining device days to simplify fleet administration.

- **Single pane management**

Manage Gearlinx and third-party devices individually or as groups.

- **Event-driven alerts**

Configure email or text alerts for offline devices, potential outages and subscription due dates.

- **Fleet reporting**

Use real-time reporting to support operational decisions and fiscal planning.
